Alliance was a turning point for me. I remember sitting in a group project with classmates, grappling with a problem that seemed insurmountable at first. We were tasked with creating a business plan, and I felt out of my depth. But as we shared ideas and brainstormed, I started to see the value of collaboration. That experience taught me how to think on my feet and adapt to challenges. My professors encouraged me to ask tough questions, to dig deeper into the 'why' behind issues. They created an environment where failure was just a stepping stone to success. Those discussions and late-night brainstorming sessions shaped my vision for Tummoc. They ignited a fire in me to take risks and to not shy away from pursuing something meaningful.
